DETAILED ACTION

1. This is in response to amendment filed on 3/31/03 in which claims 1-32 are pending. The applicant's amendment has been fully considered but they are most based on the new ground of rejection. Therefore this case is made final. (See Examiner new rejection below).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Katta et al U.S. Patent No 6,353,444 B1 in view of Farris et al U.S. Patent 6,617,253.

As per claims 1, 15 and 25, Katta et al discloses a receiver comprising: a first means for receiving (see figs. 3, 16, 25 and 35 elements 1140, 5110, 7110 and col.12, lines 19, 35 and col.26, lines 1, 28)) a transmitted signal and providing an instantaneous output signal in response thereto; a second means for storing (see figs. 3, 16, 25 and 35 elements 1120, 5160, 7170 and col.8, lines 46-47 and col.9, lines 33-36, 50-64) at least a portion of said received signal; third means (see figs. 3, 16, 25 and 35 elements 1160, 5130 and col.16, lines 22-23 and col.12, line 36 and col.13, line 21-22 and col.36, line 11) for providing replay signal; and fourth means (see figs. 13, 16, 25 and 35 elements 9300, 1300, 5300, and col.2, lines 20-26 and col.13, lines 27-43) for

Art Unit: 2631

selectively outputting said stored portion of said received signal or said instantaneous output signal in response to said replay signal.

However Katta et al does not teach said receiving means, storing means, replay and selection means disposed on a common mobile platform.

Farris et al teaches receiving means, storing means, replay and selection means disposed on a common mobile terminal which is considered as the claimed (mobile platform) (see abstract and col.1, lines 60-65 and col.5, lines 28-55 and col.6, lines 30-57 and col.16, lines 8-67).

It would have been obvious to one skill in the art to incorporate the mobile terminal of Farris et al into Katta as to provide interactive selection of information data messages, voice mail and electronic to users where the information are to be delivered or transmitted to a portable moveable telephone like device as taught by Farris (see col.4, lines 42-48).

As per claim 2, the receiver of Katta does include a radio frequency tuner (col.13, line 12).

As per claim 3, the receiver of Katta does include an audio decoder (see col.13, line 13).

As per claim 4, the receiver of Katta does include an user interface (see col.8, line 58).

As per claim 5, the receiver of Katta does include a system controller (see figs. 1, 3 16 elements 9300, 1300).

As per claims 6 and 16, the mobile terminal of does include a microprocessor (see fig.7 element 104). Furthermore implementing such microprocessor into Katta would have been

'Application/Control Number: 09/435,316

Page 4

Art Unit: 2631

obvious to one skilled in the art so that the MPEG decoder may be controlled in response to signals from the microprocessor as taught by Farris (see col.20, lines 32-24).

As per claims 7 and 17, the receiver of Katta does include a software (see col. 19, line 65).

As per claims 8-14, 18-24 and 26-32, the receiver of Katta does include a software for detection of codes (see fig.3 element 1150 and col.13, line 20):

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706,07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to

Art Unit: 2631

applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Emmanuel Bayard whose telephone number is (703) 308-9573. The examiner can

normally be reached on Monday-Thursday from 8:00 AM - 5:30 PM. The examiner can also be

reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Chi Pham, can be reached on (703) 305-4378. The fax phone number for this Group

is (703) 872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the Group receptionist whose telephone number is (703) 305-3800.
